

## **Title of the seminars**

**Matthew Alford** (University of Washington, USA)

"Observations of internal tides and dissipation in Luzon Strait"

**Dale Durran** (University of Washington, USA)

"Mountain wave drag in a slowly evolving flow and its influence on larger scale motions"

**Boris Galperin** (University of South Florida, USA)

"Turbulence-wave interaction in flows with stable stratification: spectral viewpoint "

**Vanda Grubišić** (Université of Vienna, Austria)

"Mountain waves and wave-induced turbulence: Findings from the Terrain-induced Rotor Experiment"

**Leo Maas** (Royal Institute for Sea Research, Netherlands)

"Wave attractors in stratified and rotating fluids"

**Tom Peacock** (MIT, USA)

"Laboratory modeling of internal waves"

**Riwal Plougonven** (Laboratoire de Météorologie Dynamique, France)

"Secondary generation of inertia-gravity waves following the breaking of a topographic wave"

**Kraig Winters** (Scripps Institution of Oceanography, UCSD, USA)

"Critical reflection and abyssal trapping of near-inertial waves on a beta-plane"
